SEMESTER -3

SUMMER INTERNSHIP-I [4330001] REPORT

On

“SPORTS GAME MANAGEMENT SYSTEM”

At

“ONEWAY AKSHAR TECHNOLOGY LLP”

Internship Duration: 10/08/2023 to 23/08/2023

SUBMITTED BY

SUTHAR HET(226240307065)

SUTHAR MARMIK (226240307069)

DARJI NEEV (226240307016)

SUBMITTED TO

Computer Department [07]

Government Polytechnic, Himatnagar [624]

CERTIFICATE

Government Polytechnic, Himatnagar
Computer Engineering Department
AY 2023-2024

This is to certify that the internship work embodied in this report entitled **“SPORTS GAME MANAGEMENT SYSTEM”** during **10/08/2023 to 23/08/2023** was carried out by **SUTHAR HET (226240307065), SUTHAR MARMIK (226240307069), DARJI NEEV (226240307016)** of Government Polytechnic, Himatnagar for partial fulfillment of Diploma degree to be awarded by Gujarat Technological University (GTU). This Internship work has been carried out to the satisfaction of department.

Place: GP, Himatnagar

Acknowledgement

- I would like to take this opportunity to express my heartfelt gratitude to all those who have supported and guided me throughout the course of this project. Their contributions and assistance have been invaluable, and I am truly thankful for their presence in my journey.
- First and foremost, I extend my deepest appreciation to J.B.Patel & Nirmal Patel for their unwavering guidance, encouragement, and insights. Their expertise and mentorship have been instrumental in shaping the direction and scope of this project. Their constructive feedback and continuous support have been pivotal in helping me overcome challenges and refine my work.
- I am also indebted to Government Polytechnic, Himatnagar for their collaboration and meaningful discussions. Our brainstorming sessions and exchanges of ideas have greatly enriched the project's content and its potential impact.
- My gratitude extends to [Name(s) of Research Participants or Interviewees], who generously shared their time, knowledge, and experiences, contributing significantly to the depth and quality of this project.
- I would like to acknowledge the invaluable resources provided by [Library Name/Online Database Name], which were indispensable in conducting thorough research and collecting relevant literature for this project. The ease of access to these resources facilitated the comprehensive exploration of the subject matter.

Abstract

The project Sports Club Management System creates a software that stores and manages all the data needed to describe the personal data of the members and their framework within an organization. It includes definition of various levels of hierarchy in an organization, the price structure pertaining to every element in this hierarchy, the description of every member functioning in the club and the overall sports club database which integrates all the elements mentioned above. It has a database administration that has access to the entire database, in regards with viewing and update of information. The exclusive right is implemented using authorized access. Also viewing all data and editing of personal data can be done by any admin, this also using authorized access

Chapter 1: Industry/Company Profile

1.1 Firm History

- Oneway Akshar Technology, as a website development company holds a reputed image among our contemporaries. We assure to the best services to our clients for all the work they are dependent on us. Website Development by our firm is completely original and unique. We have professionals working for our clients' website development projects that are relied upon us. We care for the trust that our clients have in us and so we assure you to keep our quality up to the mark. We work on various website development projects on an international level too.

1.2 Management Board of the Firm

- Oneway Akshar Technology LLP is a company with a robust and dynamic Management Board at its helm. Comprising a diverse group of individuals with extensive experience in various facets of the technology industry, the Management Board is the driving force behind the company's success. Their collective expertise encompasses areas such as software development, project management, finance, and strategic planning. This dedicated team works tirelessly to steer the company towards its goals and objectives, ensuring that Oneway Akshar Technology LLP remains at the forefront of innovation in the tech sector. With their visionary leadership and unwavering commitment to excellence, the Management Board plays a pivotal role in shaping the company's future and fostering its continued growth and success in the ever-evolving world of technology.

1.3 Vision and Mission

- Oneway Akshar Technology LLP is driven by a clear and compelling vision: to be a leading force in revolutionizing the technology landscape through innovation, excellence, and sustainability. Our mission is to

- harness the power of cutting-edge technology to create solutions that empower individuals and organizations to thrive in an increasingly digital
- world. We are committed to delivering state-of-the-art software products and services that not only meet but exceed the evolving needs of our clients. At the core of our mission is a dedication to integrity, quality, and social responsibility. We aim to foster an inclusive and collaborative work environment that inspires our talented team to push boundaries and bring forth transformative ideas. Ultimately, our vision and mission guide every aspect of our operations, from product development to customer relationships, as we strive to make a positive and lasting impact on the global technology landscape.

1.4 Services

- Oneway Akshar Technology LLP offers a wide range of services tailored to meet the diverse needs of our clients. Our comprehensive service portfolio includes:
 1. ****Software Development**** We excel in custom software development, building applications that align with your specific business goals. From web and mobile apps to desktop solutions, our expert developers ensure that your software is efficient, scalable, and user-friendly.
 2. ****Web Development:**** Our web development services encompass everything from creating responsive websites to building complex e-commerce platforms. We focus on delivering engaging, high-performance websites that enhance your online presence.
 3. ****Mobile App Development:**** We specialize in developing cross-platform and native mobile applications for iOS and Android devices. Our apps are designed to provide seamless user experiences and maximize functionality.
 4. ****IT Consulting:**** Our experienced consultants provide strategic guidance to help you make informed decisions about technology adoption, digital transformation, and IT infrastructure optimization.
 5. ****Cloud Services:**** We offer cloud solutions that enable businesses to harness the power of the cloud for scalability, flexibility, and cost-efficiency. This includes cloud migration, infrastructure management, and cloud application development.

6. ****Data Analytics:**** Our data analytics services help clients extract valuable insights from their data. We offer data visualization, predictive analytics, and business intelligence solutions to drive data-informed decision-making.
7. ****Cybersecurity:**** Oneway Akshar Technology LLP prioritizes security, offering robust cybersecurity services to protect your digital assets. This includes threat assessments, security audits, and proactive measures to safeguard against cyber threats.
8. ****AI and Machine Learning:**** We leverage artificial intelligence and machine learning technologies to develop intelligent applications, automate processes, and enhance user experiences.
9. ****Blockchain Solutions:**** Our expertise in blockchain technology allows us to develop secure and transparent solutions for various industries, including finance, supply chain, and healthcare.
10. ****Digital Marketing:**** We offer digital marketing services to help businesses improve their online visibility, engage with their target audience, and drive conversions through strategies such as SEO, SEM, and social media marketing.
11. ****IoT Solutions:**** Oneway Akshar Technology LLP can design and implement Internet of Things (IoT) solutions, connecting devices and collecting data for improved efficiency and decision-making.
12. ****Support and Maintenance:**** We provide ongoing support and maintenance services to ensure the smooth operation and longevity of your software applications and IT infrastructure.

Our commitment to quality, innovation, and client satisfaction underpins all our services, making Oneway Akshar Technology LLP your trusted partner for all your technology needs.

1.5 Employees and their experience

Name: Nirmal s patel

Experience: Mr. Nirmal s patel has 10 years of prolific experience as a successful full-stack web developer. Our overall business strength is shaped by our core strategies and values, wherein we strive to uphold the competence and excellence level of our services by giving equal importance to all stakeholders involved in the chain, such as our diverse talented work team, partners, clients, and the

society. Moreover, in our pursuit to create brilliant business opportunities and ensure value-added solutions to our clients, we've explored new applications and best of the breed techniques within the areas of web design, software development, and online marketing.

Name: Jangid pinky bharilal

Experience: Ms. Jangid pinky bharilal have 2.5 years of prolific experience as a successful full-stack web developer. With a keen eye for design and a robust command over various programming languages, she has consistently delivered innovative and user-centric web solutions.

Chapter 2: Internship Experience & Job Description

2.1 Name and short Description of the project

Name;Oneway Akshar Technology LLP

Description: A cricket management system is a specialized software application designed to assist in the management and organization of cricket-related activities. It includes features such as player registration, team creation, match scheduling, score tracking, performance analysis, and communication tools. The system aims to simplify the management of cricket events, from local matches to tournaments, and helps track player statistics, match results, and other relevant information. This system enhances the overall administration and coordination of cricket-related operations within a club or organization

2.2 Involvement in Software/Hardware development process

Software Development Process:

Requirements Gathering: Identify the needs and features of the Cricket Club management system, such as player profiles, match schedules, and statistics.

Design: Create a user interface (UI) design using HTML for structure, CSS for styling, and JavaScript for interactivity. Plan the database structure if the project involves data storage.

Implementation: Write HTML to structure the content, CSS for styling the UI elements, and JavaScript for adding dynamic behavior. Implement client-side validation and interactivity for a smooth user experience.

Testing: Test the system to ensure all features work correctly and that the UI is responsive across different devices and screen sizes.

Debugging: Identify and fix any issues or bugs that arise during testing.

Hardware Development Process:

Hardware Requirements: Determine the hardware needed to run the project. This includes the server where the website will be hosted and the devices users will use to access the system (e.g., computers, tablets, smartphones).

Server Setup: Configure the server with the necessary software stack (e.g., web server, database server) to host the project.

Network Configuration: Ensure that the server is properly connected to the internet and that network configurations allow users to access the website.

Security Measures: Implement security measures to protect user data and the system from potential threats. This includes using encryption, firewalls, and regular security updates.

Scalability: If the project gains popularity, ensure that the hardware can handle increased traffic by considering load balancing and other scalability measures.

Deployment: Deploy the project to a web server or hosting platform so that it can be accessed by users.

2.3 Involvement in Planning

Involvement in planning a Cricket Club Management System project would typically include defining project goals, outlining features, estimating resources, setting a timeline, identifying stakeholders, and creating a project plan. It's crucial to establish clear objectives and scope, allocate tasks, and consider potential challenges in order to ensure the project's success.

2.4 Involvement in Implementation, testing and documenting

Implementation: Developing the software, coding features, and functionalities based on the project requirements.

Testing: Performing various testing phases like unit testing, integration testing, and user acceptance testing to ensure the system works as intended.

Documenting: Creating user manuals, technical documentation, and any necessary guides to assist users and future developers in understanding and using the system effectively

2.5 Involvement in Deployment and Maintenance

Deployment:

Server Setup: Configure the server environment (e.g., Apache, Nginx) to host the web application.

Domain and Hosting: Register a domain name and choose a hosting service to make the application accessible online.

File Transfer: Upload your HTML, CSS, JS files, and any backend scripts or databases to the server.

Database Configuration: If the system uses a database, set up the database server and populate it with initial data.

Maintenance:

Bug Fixes: Continuously monitor the application for bugs and glitches and provide timely fixes.

Performance Optimization: Optimize the code, images, and other resources to ensure the application runs efficiently.

Security Updates: Regularly update dependencies, libraries, and frameworks to patch security vulnerabilities.

Content Updates: Update content such as schedules, scores, and news as needed.

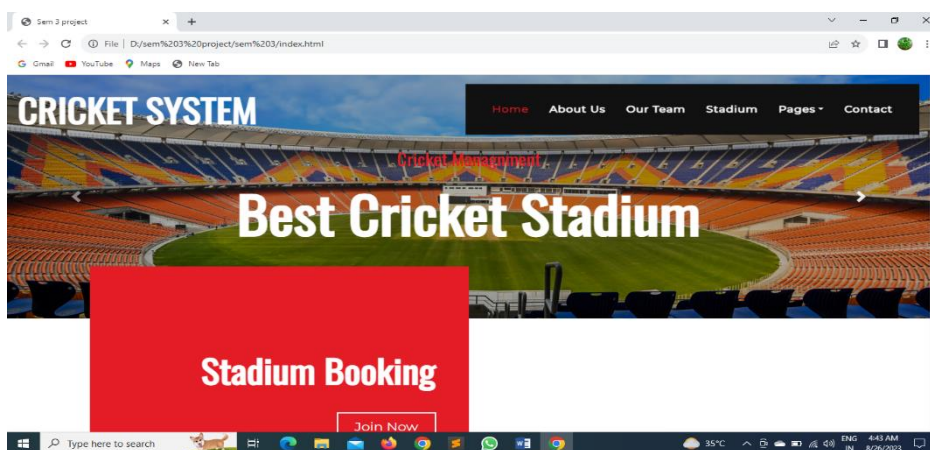

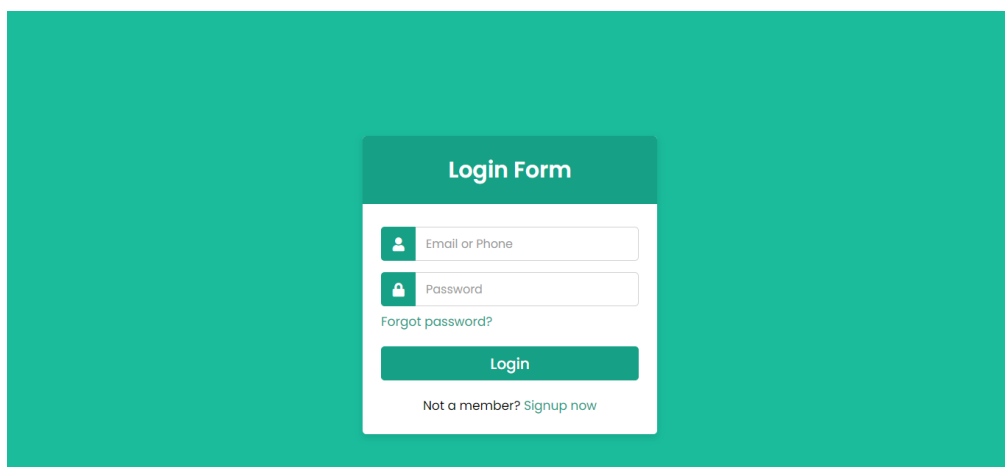

User Support: Address user queries and issues, and provide assistance when needed.

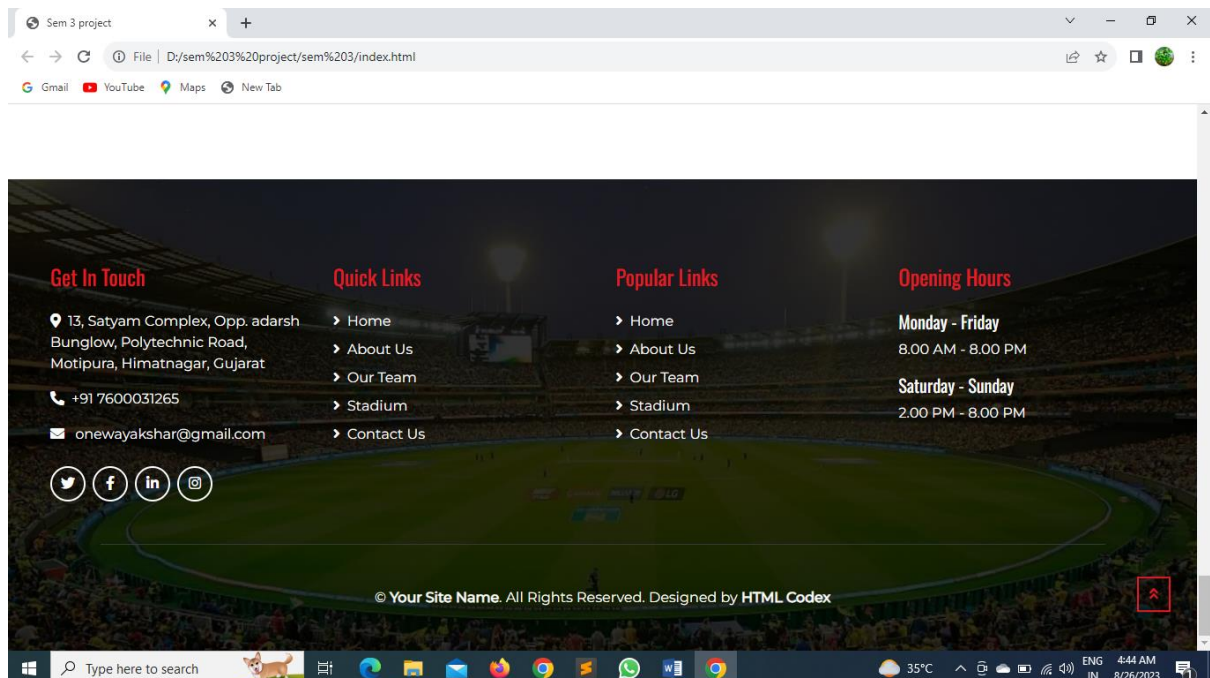

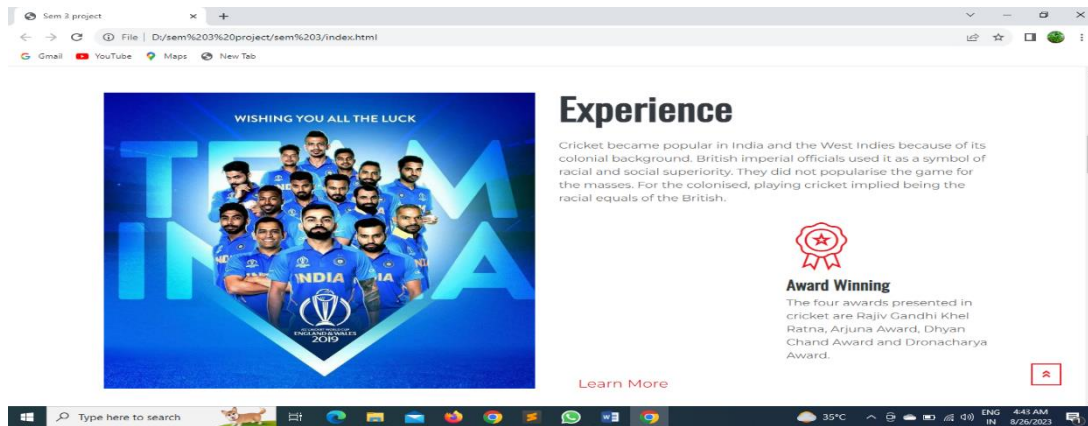

Backup and Recovery: Implement backup and recovery mechanisms to prevent data loss.

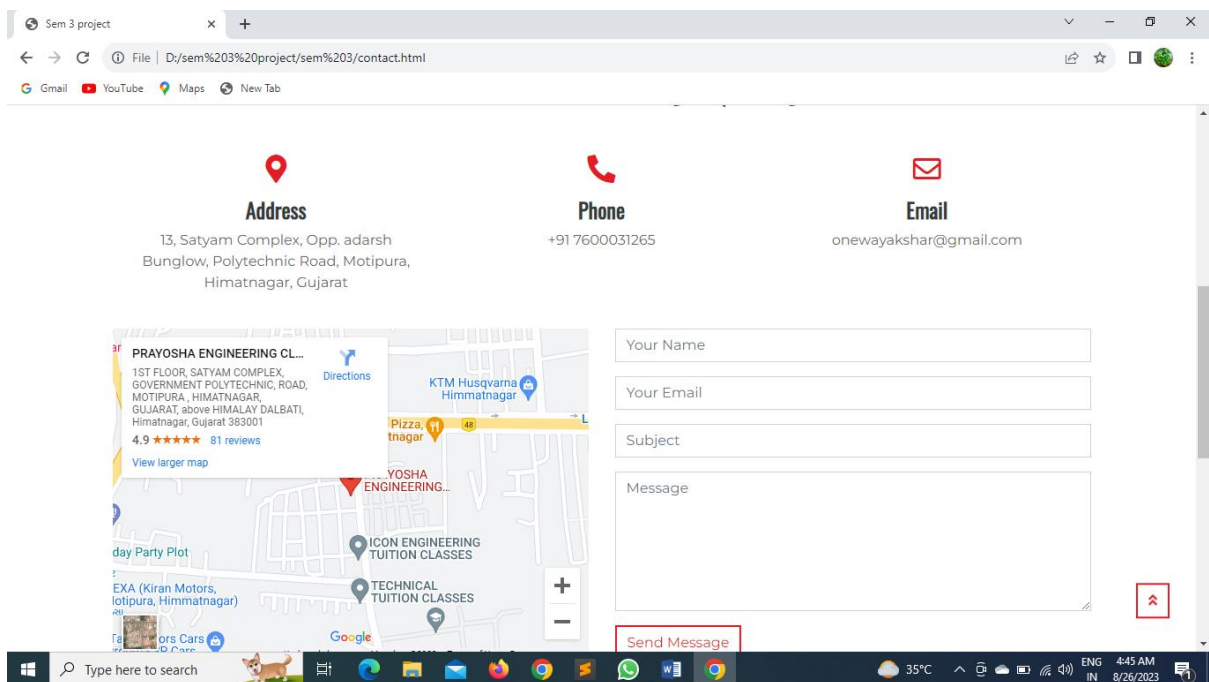

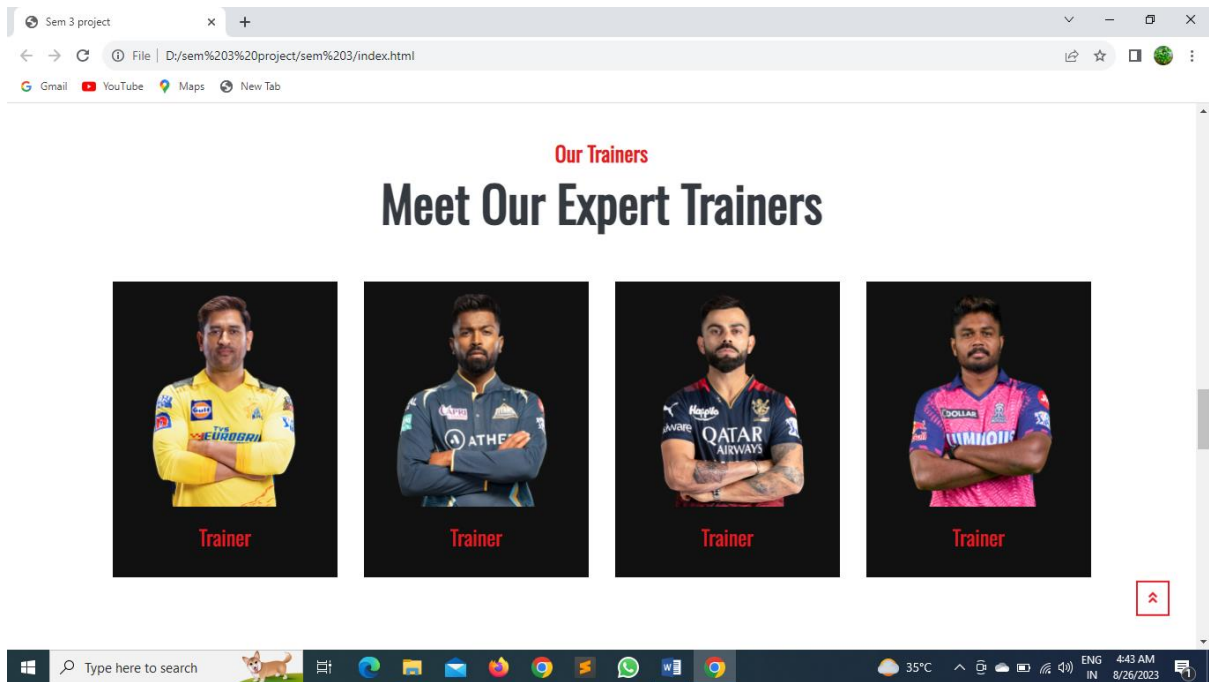

Feature Enhancements: Based on user feedback and changing requirements, add new features or improve existing ones.

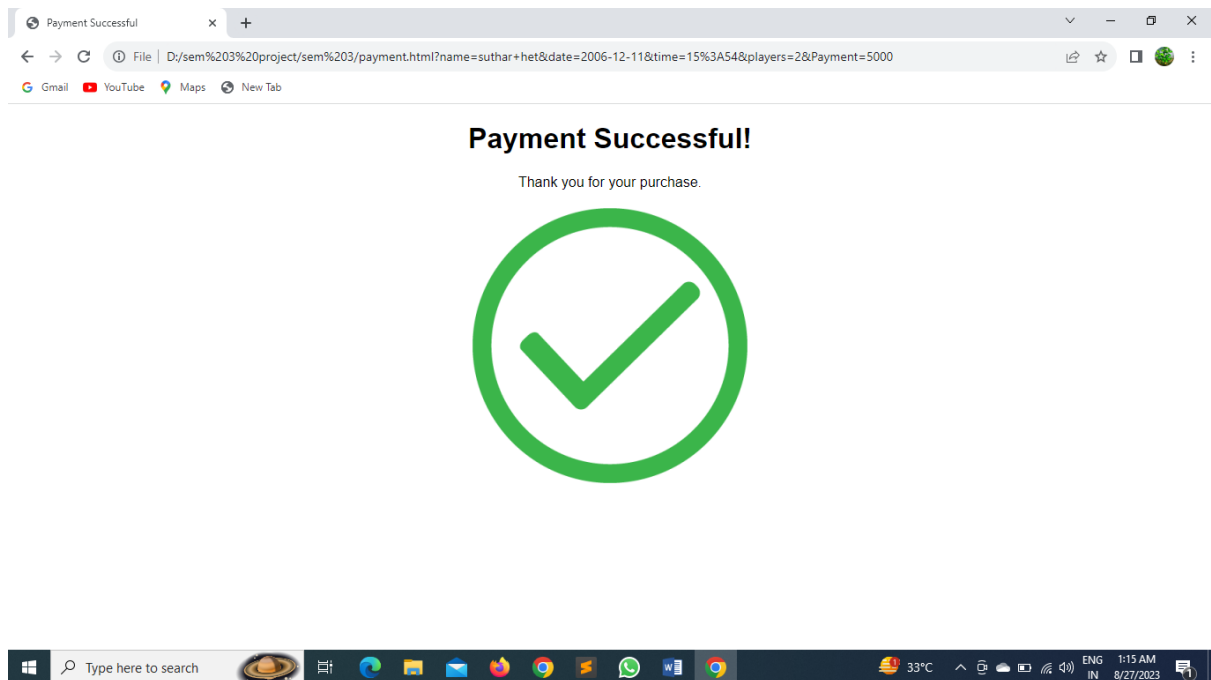

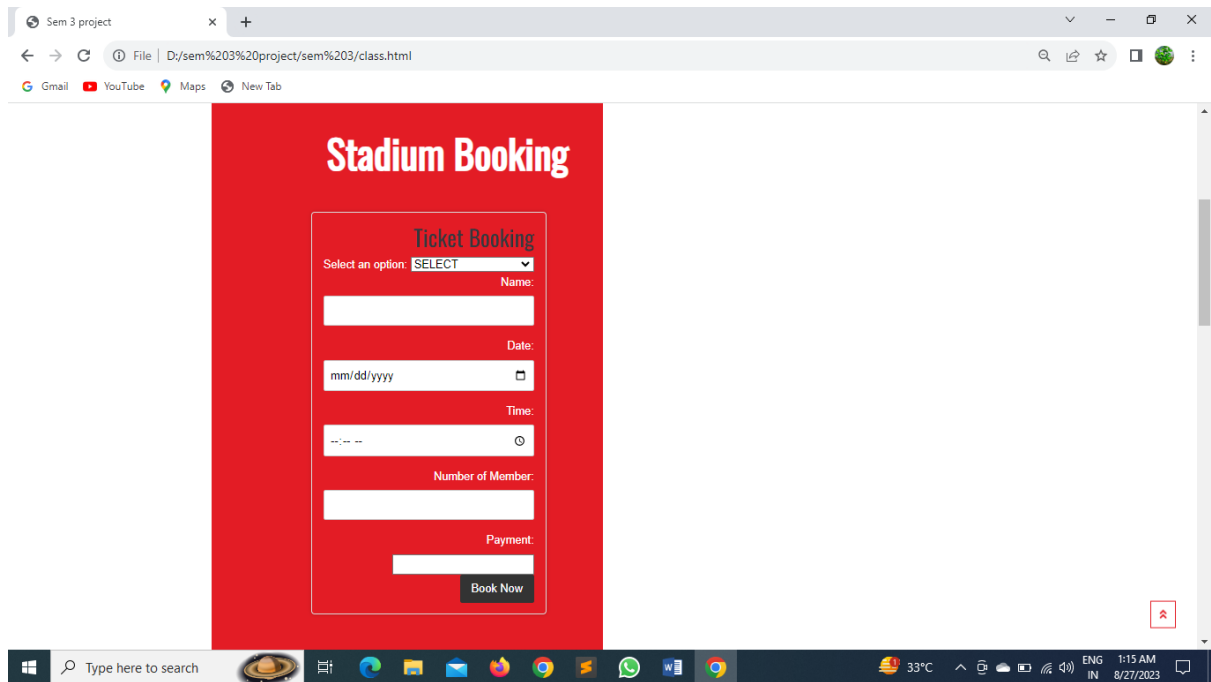

Scalability: Monitor the application's usage patterns and scale resources as the user base grows

Chapter 3: Learnings and Findings during Internships

3.1 Types of Teams in the firm

1. Full Stack Development Team
2. Data Analytics Team
3. Front End Development Team
4. Back End Development Team

3.2 Hierarchy of role/post in the firm

In a company's hierarchy, roles are organized based on their level Of responsibility, authority, and specialization.

1. CEO:-Nirmal s patel

2. CTO: Nihar k patel

3. Department Heads:

- Full Stack Development
- .Data Analytics
- Front End Development
- Back End Development.

4. Team Leads/Managers:

- .Full Stack Development Team Lead
- Data Analytics Team Lead
- Front End Development Team Lead
- Back End Development Team Lead
- Editorial Team Lead

5. Team Members:

- **Full Stack Developers**
- **Data Analysts**
- **Front End Developers**
- **Back End Developers**

3.3 Timings and Work culture of the firm

Work Hours: Monday to Saturday, 8:00 AM to 2:00 PM

At oneway Akshar Technology LLP, Our work culture emphasizes professionalism, collaboration, and continuous learning. We encourage innovation, value diversity, and prioritize employee well-being. Flexibility is considered while upholding a results-oriented approach, acknowledging occasional project demands beyond standard hours.

3.4 Challenges involved in the firm

oneway Akshar Technology LLP navigates challenges stemming from rapid technological shifts, requiring continuous adaptation. Attracting and retaining top talent amidst fierce competition demands a nurturing environment for growth. Balancing project deadlines with quality delivery is a constant focus, while diverse client needs necessitate flexibility and effective communication. The Industry's competitiveness underscores the importance of ongoing innovation and differentiation to ensure our sustained success.

3.5 Opportunities in the firm

oneway Akshar Technology LLP is poised to seize various opportunities:

1. **Technological Innovation:** Embrace new tools and platforms for enhanced services.
2. **Employee Growth:** Invest in learning to drive innovation.
3. **Diverse Client Base:** Gain insights from varied industries and forge partnerships.
4. **Innovation Hub:** Encourage creative solutions for added value.
5. **Market Expansion:** Capitalize on tech demand for growth.
6. **Strategic Partnerships:** Collaborate for broader capabilities.
7. **Digital Transformation:** Guide businesses through digital evolution.
8. **Data Insights:** Utilize analytics for informed decisions.

Chapter 4: Conclusion & References

4.1 Conclusion

- In conclusion, the Cricket Club Management System project implemented using HTML, CSS, and JavaScript successfully addresses the need for efficient management of cricket club activities. The project provides a user-friendly interface for club members, administrators, and coaches to perform various tasks such as player registration, scheduling matches, updating scores, and managing club resources. The use of HTML ensured proper structuring of the webpages, CSS enabled appealing and consistent styling, and JavaScript added interactivity and dynamic functionality to enhance the user experience.
- Through this project, we learned the importance of front-end technologies in creating responsive and interactive web applications. The separation of concerns achieved by using HTML, CSS, and JavaScript individually allowed for easier maintenance and updates. Additionally, the project highlighted the significance of user experience design, as well as the need for robust validation and error handling to ensure data integrity.
